

Head

Surest expands menu of virtual care options.

The Surest health plan has recently expanded virtual care coverage. See a board-certified doctor or other medical professional from broad, national UnitedHealthcare networks for the following needs:

- Virtual primary care
- Virtual urgent and acute care
- Virtual mental and behavioral health
- Virtual serious mental illness
- Virtual intensive outpatient therapy
- Virtual substance use support
- Virtual eating disorder support
- Virtual exercise therapy
- Virtual gastroenterology
- Virtual speech therapy
- Virtual migraine clinic

Three easy ways to find virtual care:

1. Search in the app or website and related virtual options will appear. It's part of the search experience. Schedule an appointment right from the link.
2. For added awareness, you'll see virtual alternatives when selecting "in-person medical office visit."
3. And — when you're in the app — you'll be notified of certain virtual care programs available to you.
