affected by cultural background and technological resources. People <u>depend</u> on the environment for their basic needs and for many recreational activities. People adapt to the environment with the clothing they wear, the housing they build, and the way they use the land. Patterns related to seasons, climate. People change the environment with their techniques of farming, forestry, and mining. Modern transportation systems deplete resources and cause air pollution. MOVEMENT <u>People, products, information, and ideas move in east-amount</u>
