Additional Drug Coverage

This is not a complete list of prescription drugs and supplies available to you. The prescription drugs and supplies on this list are covered in addition to the plan's Drug List (Formulary). You can find the plan's Drug List on your member site or scan the QR code at the end of this Additional Drug Coverage section.

Lower-cost Medicare prescription drugs and supplies

Your plan covers some of your Medicare prescription drugs and supplies at a \$0 copay.

Diabetic supplies	Diabetic supplies	
Alcohol swabs	Insulin syringes	
Gauze pads 2"x2"	Omnipod	
Insulin pen needles	V-Go	

Information about the appeals and grievance process for these prescription drugs and supplies can be found in your Evidence of Coverage.

Bold type = Brand name drug Plain type = Generic drug

Covered drugs are placed in tiers. Each tier may have a different cost. See the Summary of Benefits to find out what you'll pay for these drugs.

Although you pay the same copay for these drugs as shown in the Summary of Benefits and Evidence of Coverage, the amount you pay for these additional prescription drugs does not apply to your Medicare Part D out-of-pocket costs. Payments for these additional prescription drugs (made by you or the plan) are treated differently from payments made for other prescription drugs.

Coverage for the prescription drugs on the bonus drug list is in addition to your Medicare prescription drug coverage under the plan. Unlike your Medicare prescription drug coverage under the plan, you are unable to file a Medicare appeal or grievance for drugs on the bonus drug list.

If you get Extra Help from Medicare to pay for your prescription drugs, it will not apply to the drugs on this bonus drug list.

If your drug has any coverage rules or limits, there will be code(s) in the "Coverage rules or limits on use" column of the chart. The codes and what they mean are shown below.

QL - Quantity limits

The plan will only cover a certain amount of this drug for one copay or over a certain number of days. These limits can help ensure safe and effective use of the drug.

MME - Morphine Milligram Equivalent

Additional quantity limits may apply to all opioid drugs used to treat pain. This additional limit is called a cumulative Morphine Milligram Equivalent (MME). It's designed to monitor safe dosing levels of opioids for people who may be taking more than one opioid drug for pain management. If your doctor or prescriber prescribes more than this amount or thinks the limit is not right for your situation, you or your doctor or prescriber can ask the plan to cover the additional quantity.

7D - 7-day limit

An opioid drug used to treat pain may be limited to a 7-day supply if you don't have a recent history of using opioids. This limit helps minimize long-term opioid use. If you are new to the plan and have a recent history of using opioids, the pharmacy may override the limit when appropriate.

DL - Dispensing limit

Dispensing limits apply to this drug. This drug is limited to a one-month supply per prescription.

This information is not a complete description of benefits. Contact the plan for more information.

Limitations, copay, and restrictions may apply.

Benefits and/or copay/coinsurance may change each plan/benefit year.

The Drug List may change at any time. You will receive notice when necessary.

This information is available for free in other languages. Please call our Customer Service number on the cover.
